

MiVueTM C330

Your personal eyewitness on the road, with integrated GPS and lifetime safety camera alerts.

With the new, compact and lightweight MiVue C330 you'll always have proof of what really happened on the road. For your convenience, the dash cam will start recording when you start your car. Full HD 1080 pixel camera records your journey, functioning as your personal eyewitness on the road. So in case of an accident, you'll always have recordings of what happened.

Of course, you can also use your dash cam simply when driving through beautiful, memorable scenery, so you can share your experiences with friends and family afterwards. And with the intuitive MiVue Manager desktop application, you can share your videos on Facebook® and YouTube as well.

The integrated GPS tracks your route, including speed, altitude, longitude, latitude and heading, and thanks to the safety camera data with monthly updates for the lifetime of your device, you'll always know where to drive extra carefully.*

The new MiVue C330 perfectly combines a dash cam with GPS tracking and safety camera data, which makes it the ideal solution for everyone who wants to feel safe while driving.

Why use a dash cam?

Proof in case of accidents – Mio's dash cams have the ability to record every vehicle journey including capturing the moment of an impact so can help provide proof before, during and after an accident.

Protect yourself from fraudulent claims – Recorded proof from the dash cams can be used to help resolve accident liability claims, 'stop cash for crash' claims as well as protect your 'No Claims Bonus'.

Peace of mind when driving on the roads – Feeling and being safe on the road is paramount! So why not protect yourself against instances of road rage and become more aware of your own driving speed with the safety camera alerts.

Box Contents

- Mio MiVue C330
- In-vehicle charger
- In-vehicle mounting bracket
- Quick Start Guide
- Registration leaflet
- Warranty Card

Feature highlights

- 1080p Full HD recording at 30 fps - with the latest H.264 technology for high quality videos at a smaller file size

- Safety camera warnings - free safety camera data with monthly updates for the lifetime of your device, so you'll always know where to drive extra carefully*

- GPS tracking - automatically records your driving information, including speed, altitude, longitude, latitude and heading

- Wide viewing angle - 130° wide-angle lens to capture every detail at critical moments

- F2.0 lens - this results in brighter and clearer videos, even in low light conditions

- 3-Axis G-Sensor - records direction and force, including impact, turns and acceleration

- Rotating mount design - mount is easily rotated to any desired angle for video evidence collection

- Switch to photo mode - use the dash cam as a camera for close-up accident evidence collection

*Excludes France, Switzerland, Lithuania, Latvia, Estonia
Safety camera updates for the lifetime of your device.
